## L'AZIENDA

Fondata nel 1998 Tecno A risponde alle richieste più esigenti nel settore della carpenteria medio leggera. Perfettamente inserita nelle dinamiche imprenditoriali contemporanee, inizia a costruire il prodotto semilavorato indirizzato a terzi. L'azienda è divenuta in seguito leader nel settore, riuscendo a realizzare il prodotto finito. Il nuovo viaggio intrapreso intorno alla conoscenza della lavorazione ha portato la Tecno A a specializzarsi nel settore dell'arredamento per automezzi: nasce Order System® ... ordine in movimento.

## THE COMPANY

Founded in 1998 Tecno A answers to the most demanding requests in the field of medium-light metal carpentry. In perfect harmony with contemporary entrepreneurial dynamics, Tecno A began making semi-finished products for third parties. The company then became a leader in the field, eventually manufacturing finished products. The new journey undertaken to understand production techniques has brought Tecno A to specialize in an area dedicated to inside furnishings for vans, giving rise to Order System®... order in movement.

## DIE FIRMA

Seit 1998 entwickelt das Unternehmen Tecno A Lösungen für Kunden im Bereich des Zimmerei- und Holzhandwerks. Perfekt angepasst an die Dynamik der heutigen Geschäftswelt, begann man mit der Produktion von Maschinen für Drittfirmer. Das Unternehmen wurde später führend in diesem Gebiet. Nun begann sich Tecno A auf die Produktion von eigenen Einrichtungen für Nutzfahrzeuge zu spezialisieren, es entstand die Marke Order System®... mobile Ordnung.

## SISTEMA QUALITÀ CERTIFICATA ISO 9001

## QUALITY SYSTEM CERTIFICATED ISO 9001

## QUALITÄT SYSTEM ZERTIFIZIERT ISO 9001

## LA PRODUZIONE

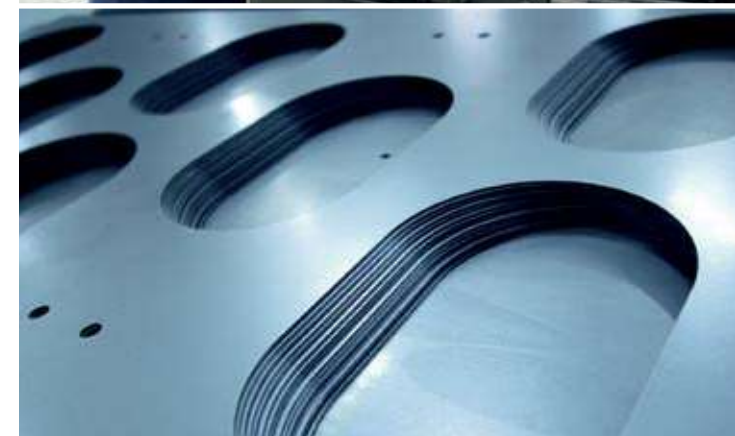

La produzione Order System® si svolge interamente nei due stabilimenti della Tecno A, dove avvengono tutte le fasi della lavorazione del prodotto: dalla selezione delle materie prime al taglio delle lamiere, dalla piegatura alla saldatura, dalla verniciatura all'assemblaggio e montaggio finale. Tutti i componenti prodotti dalla Tecno A sono realizzati con macchinari di ultima generazione.

## PRODUCTION

Order system® production is entirely based in the two Tecno A factories, where all the phases regarding the making of the product take place: from the selection of raw materials to the cutting of sheet metal, from bending to welding, from varnishing, to assembling and final fitting. All items produced by Tecno A are made with latest generation machinery.

## DIE PRODUKTION

Die gesamte Order System® Produktion findet in den zwei Tecno A Werken statt, wo alle Komponenten produziert werden: von der Auswahl der Rohstoffe zum Blechschnitt, von der Biegung bis zum Schweißen, von der Lackierung bis hin zur Endmontage. Alle Tecno A Komponenten sind mit Maschinen der neusten Generation produziert.

## LA FILOSOFIA

Order System® ha come obiettivo primario, quello di collaborare con il cliente per allestire la soluzione migliore per efficienza e funzionalità, quindi ha creato una rete vendita specializzata e autorizzata dove troverete dei tecnici che con la loro esperienza vi aiuteranno e vi consiglieranno nell'allestimento più appropriato per la vostra esigenza di lavoro. Grazie al contatto quotidiano col cliente, il sistema Order System® viene continuamente migliorato: i difetti vengono corretti, nuovi prodotti vengono introdotti, la funzionalità di tutti i prodotti continuamente aggiornata. Questo fa di Order System® uno dei migliori e più completi sistemi di allestimento per furgoni.

## PHILOSOPHY

Order System® main aim is to collaborate with the client in order to find the best solution regarding efficiency and functionality. This way it has created a specialized and authorized sales network where you find technicians who, through their experience, will help you choosing the most suitable equipment for your needs. Thanks to the daily contact with customers Order System® design continuously improves: defects are corrected, new products are inserted in the collection, product's functionality is always updated. This allows Order System® to become one of the best and most complete van fitting-systems.

## DIE PHILOSOPHIE

Das wichtigste Ziel von Order System® ist die Zusammenarbeit mit den Kunden, um eine leistungsfähige und zweckmäßige Fahrzeugeinrichtung zusammen zu stellen. Deshalb hat Order System® ein spezialisiertes und autorisiertes Vertriebsnetz gegründet, wo erfahrenes Fachpersonal Ihnen hilft eine für Ihre Arbeitsbedürfnisse angepasste Fahrzeugeinrichtung zu konfigurieren. Dank täglichem Kontakt zu den Kunden, wird das Order System® Produkt ständig verbessert: Fehler behoben, neue Produkte eingeführt und die Zweckdienlichkeit der Produkte immer neu geprüft. Dies lässt Order System® eines der besten und umfangreichsten Einrichtungssysteme für Nutzfahrzeuge werden.

## SISTEMI E PRODOTTI

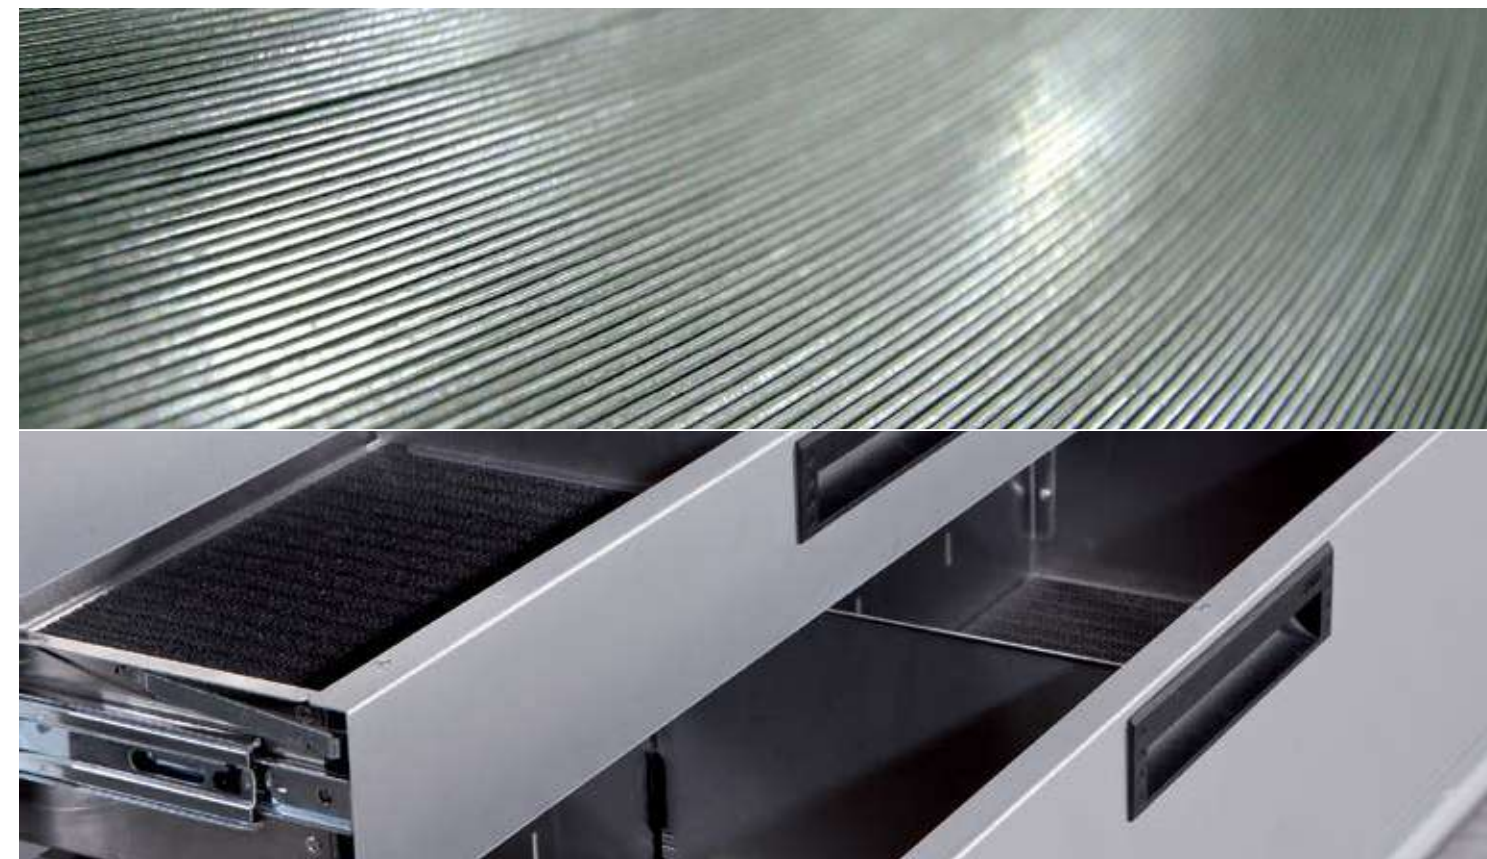

I prodotti Order System® sono stati progettati e costruiti per una clientela professionale. Infatti i materiali impiegati sono completamente in acciaio e in alluminio di spessore elevato per garantire un mix di robustezza di carico, durata nel tempo e leggerezza allo stesso tempo. Order System® offre con i suoi prodotti una vasta gamma di soluzioni per migliorare e velocizzare il vostro lavoro quotidiano, inoltre a garantirvi sicurezza e immagine professionale. La linea è completamente modulare, quindi il cliente che acquisterà un nuovo furgone, potrà riutilizzare l'allestimento e riuscirà ad integrare particolari di arredamento nuovi, con quelli installati precedentemente.

## SYSTEMS AND PRODUCTS

Order System® items are designed for a professional clientele. Only steel and aluminium of elevated thickness are used to grant a mix of sturdiness for load, time wear and lightness. With its items Order System® offers a wide range of solutions for improving and fastening your daily activity, ensuring, moreover, safety and professional image. The design is completely modular, so that the customer who buys a new van will be able to integrate pieces of new furnishing with those previously installed.

## SYSTEME UND PRODUKTE

Order System® Produkte sind für den Profibereich vorgesehen. Es werden nur hochwertiger Stahl und Aluminium benutzt, um einen Mix aus höchster Tragkraft, Langlebigkeit und Leichtigkeit zu gewährleisten. Mit seinen vielfältigen Produkten bietet Order System® eine große Auswahl an Lösungen, die Ihre tägliche Arbeit verbessert und schneller werden lässt. Die Linie besteht aus modulationsfähigen Elementen, so dass neue Einrichtungsteile mit den früher eingebauten kombiniert werden können.

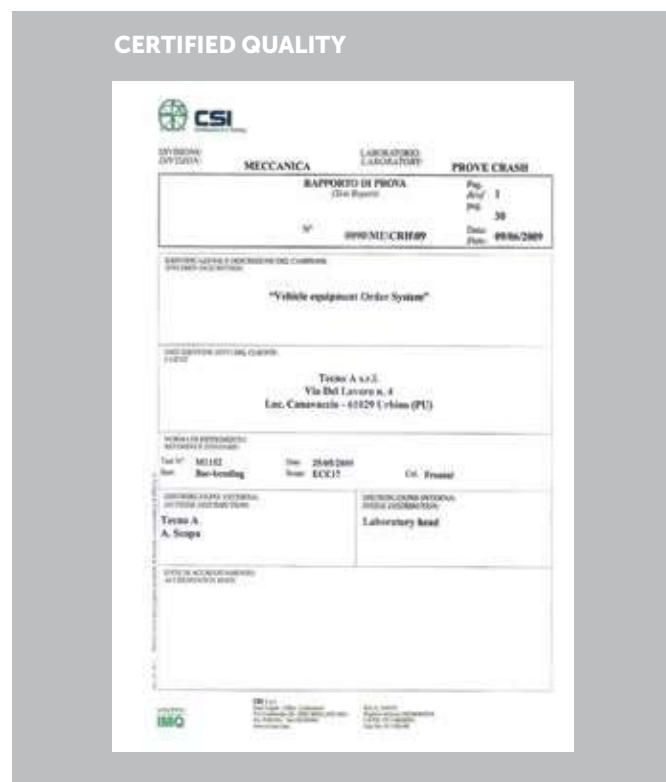

## LAVORARE E GUIDARE IN SICUREZZA

Nel Centro prove del CSI divisione Meccanica a Milano, la Tecno A S.r.l. ha sottoposto l'allestimento per autoveicoli Order System® ai rigorosissimi controlli stabiliti dalla norma ECE R17. Sono stati effettuati test per verificare la stabilità degli allestimenti interni installati negli autoveicoli, considerando la sicurezza dei passeggeri in caso di incidente. Dai test eseguiti i componenti Order System® hanno soddisfatto tutti i requisiti richiesti, superando eccellentemente la prova del crash-test. Il risultato confermato dal laboratorio è il seguente: La scocca, con il vano di carico allestito con il sistema Order System®, è stata sottoposta alla stessa decelerazione prevista dal Regolamento ECE17 e dalla Direttiva 74/408/CE per l'impatto frontale. A seguito della prova non si è verificata intrusione di elementi dell'allestimento, o di sacchetti di zavorra contenuti in esso, all'interno dell'abitacolo. In conclusione, la prova ha dimostrato che in caso di incidente l'allestimento Order System® protegge conducente e passeggeri dal materiale trasportato. Nelle foto crash-test Order System® si può notare come l'allestimento ha reagito in fase di urto, deformandosi ma senza pericolosi distaccamenti di componenti e trattenendo il carico stivato.

## SAFELY WORKING AND DRIVING

At the Test Centre of CSI, Mechanics department, in Milan, Tecno A S.r.l. submitted Order System van equipments to the rigorous checks established by rule ECE R17. Tests have been made in order to verify the stability of the equipment installed inside the vehicle, considering safeness of passengers in case of crash. Through these tests Order System elements have satisfied all requirements, passing the crash-test excellently. The result confirmed by the laboratory is the following: The body, being the charging area equipped with Order System elements, has been submitted to the same deceleration established by the Rule ECE17 and Directive 74/408/CE in case of frontal crash. As a consequence of the test there has been no intrusion of parts of the equipment, or of the ballast sacks contained in the equipment itself, inside the driver's cab. Finally the test proved that, in case of accident, Order System equipment protects both driver and passenger from what is carried on. In the photos of Order System crash-test it may be seen how the equipment has reacted during the collision, becoming deformed but without dangerous detachment of some part of it and holding back the load.

Information about the simulation with body:  
Weight of the equipment: 181 kg  
Load: 270 kg

## SICHER ARBEITEN UND FAHREN

Tecno A Srl hat beim CSI Prüfungszentrum in Mailand seine Order System Fahrzeugeinrichtung der strengen Kontrolle der ECE R17 Norm unterzogen. Ziel des Tests ist die Einrichtungsstabilität in Anbetracht der Fahrgastsicherheit bei Unfällen zu überprüfen. Die Order System Komponenten haben alle Testanforderungen erfüllt und haben die Crash-Test Prüfung mit sehr gut bestanden. Der Test ergab folgendes Ergebnis: Der mit Order System Fahrzeugeinrichtung ausgestatteter Laderaum, wurde der nach ECE 17 Norm und der 74/408/CEE Richtlinien für Frontalaufprall vorgeschriebenen Geschwindigkeitsreduzierung unterzogen. Der Test hat bewiesen, dass sowohl Fahrer als auch Fahrgast bei Unfällen mit Order System Fahrzeugeinrichtungen geschützt sind. Während des Tests sind weder einzelne Elemente der Einrichtung noch die in der Einrichtung gelagerten Ballastsäcke in den Fahrgastraum eingedrungen. Auf den Fotos des Crashtest ist die Verformung der Einrichtung zu erkennen, jedoch kam es zu keinem Zeitpunkt zu einer Lösung von Einrichtungsteilen oder den verstauten Ballastsäcken.

#### LAVORARE E GUIDARE IN SICUREZZA

Tecno A S.r.l. ha eseguito un nuovo crash test per gli allestimenti Order System®, alla velocità di 60 km/h e ha superato brillantemente la prova al primo tentativo dimostrando la qualità del prodotto. Il crash test è stato eseguito in Francia presso VALUTEC S.A. dipartimento C3T (Centro Tecnologico in Trasporti Terrestri). Order System® tiene molto alla salute e alla sicurezza dei suoi clienti.

#### SAFELY WORKING AND DRIVING

Tecno A S.r.l. has performed a new crash tests for the Van Equipments Order System® at a speed of 60 km/h and has passed the test on the first try demonstrating the quality of the product. The crash test was performed in France at VALUTEC SA Department C3T (in Land Transport Technology Centre). Order System® cares about to the health and safety of its customers.

#### SICHER ARBEITEN UND FAHREN

Tecno A S.r.l. hat einen neuen Crashtest für die Einrichtungen von Order System® mit einer Geschwindigkeit von 60 km/h durchgeführt und hat diesen beim ersten Versuch bestanden und somit die Qualität des Produkts nachgewiesen. Der Crashtest wurde in Frankreich bei VALUTEC S.A. Abteilung C3T (Technology Center im Landverkehr) durchgeführt. Order System® legt großen Wert auf die Gesundheit und Sicherheit seiner Kunden!

#### **DIFENDI IL TUO INVESTIMENTO**

I rivestimenti interni Order System® sono studiati e progettati per proteggere il vostro furgone dal materiale trasportato e per agevolare il vostro lavoro quotidiano. I rivestimenti si classificano in quattro elementi: Pianali, Rivestimenti delle pareti interne, Rivestimento parete divisoria, e copri-ruota. Con questi quattro elementi il Vostro furgone è protetto e pronto per lavorare.

#### **DEFEND YOUR INVESTMENT**

Order System® internal linings are studied and planned to protect your vehicle from the carried on material and to make your daily work easier. The linings are composed by four parts: floor, internal walls' cover, dividing bulkhead's cover and wheelhouse cover. With these four elements your vehicle is protected and ready to work.

#### **SCHÜTZE DEIN INVESTMENT**

Order System® Innenverkleidungen dienen dem Schutz Ihres Fahrzeuges vor Transportschäden und um Ihre tägliche Arbeit zu erleichtern. Die ganze Verkleidung besteht aus vier Teilen: Fahrzeugboden, Innenverkleidung, Trennwandverkleidung und Radkastenschutz. Mit diesen vier Teilen ist Ihr Fahrzeug geschützt und arbeitsbereit.

### PIANALI, PASSARUOTA E RIVESTIMENTI INTERNI

Order System in questa categoria ha racchiuso tutto quello che serve per proteggere internamente i vostri furgoni.

### FLOORS, WHEELHOUSE COVERS AND INTERNAL LININGS

Order System has included in this category all you need to protect the inside of your vans.

### FAHRZEUGBÖDEN, RADKASTENSCHUTZ UND INNENVERKLEIDUNGEN

Order System bietet alles, was Sie benötigen um das Innere Ihres Fahrzeuges zu schützen.

#### PIANALI

I nostri pianali sono realizzati in multistrato marino finlandese, e in alluminio mandorlato da 3 mm + 2mm. La parte superiore del pianale in multistrato marino è protetta da un filo di resina protettivo di alto spessore, il quale funge da antiscivolo, mentre la parte inferiore è ricoperta sempre da una resina solo protettiva.

I bordi del pianale sulle porte posteriori e su quelle laterali sono protetti da angolari in alluminio, eccetto alcuni modelli che li hanno solo sulle porte posteriori. Il fissaggio dei pianali consiste nell'adagiare i pianali sul fondo del furgone, forare il pianale in direzione delle nervature, e applicare i rivetti. Il fissaggio avviene applicando del silicone su tutto il suo perimetro esclusa la zona delle porte.

#### FLOORS

Our floors are made in Finnish nautical multi-layer and in corrugated aluminium 3 mm + 2mm. The superior part of the floor is protected by an elevated thickness film of resin, that act as anti-slip, while the inferior part is covered with an only protective resin. The exposed edges of the floor on the lateral and rear doors are protected by angles in aluminium, except a few models that have the angles only on the rear doors. The fixing of the floors consists on laying down the panel on the bottom of the van, then the panel will be perforated towards the rib and the rivets applied into the holes. Finally silicon has to be applied all around the perimeter of the floor, except the area of the doors, for the fixing itself.

#### FAHRZEUGBÖDEN

Unsere Böden werden aus finnischem Mehrschichtholz oder aus 3 + 2 mm gewölbtem Aluminium produziert. Die Oberfläche der Mehrschichtholzplatte ist mit einem hochwertigen Harzfilm geschützt, der als Antirutschsystem dient, während die Unterseite mit Schutzharz überzogen ist. Die Bodenränder an den Hintertüren und den Seitentüren sind durch gerändelte Aluminium-Winkelprofile geschützt. Die gleichen Böden stehen auch aus gerändeltem Aluminium zur Verfügung, Dicke 3 mm + 2 mm.

### RIVESTIMENTI INTERNI

I rivestimenti per le pareti interne dei furgoni sono costituiti da pannelli sagomati e forati e vengono realizzati in lamiera preverniciata, in alluminio e in alluminio mandorlato. Il compito principale del rivestimento Order System è quello di creare un'intercapedine tra la carrozzeria e la pannellatura, in modo tale che se dovesse avvenire un urto violento dovuto al ribaltamento del materiale la carrozzeria non vada danneggiata. Essi sostituiscono in quanto fragili le pannellature di cartone già predisposte dalle case costruttrici, e coprono le parti scoperte rimanenti. Non sostituiscono le pannellature in plastica originali sagomate. Le pannellature Order System vengono fissate alla carrozzeria mediante viti auto-perforanti o rivetti a strappo. Prima del fissaggio viene applicato del silicone, per eliminare le possibili vibrazioni. La pannellatura integrale comprende il lato sinistro, il lato destro e le porte posteriori inferiori, mentre le porte posteriori superiori devono essere ordinate separatamente in quanto possono essere cieche o grigliate per vetri, in base al furgone e alle esigenze del cliente.

#### INTERNAL LININGS

The lining for the internal walls of the vans are composed of shaped, perforated panels made of painted iron, aluminium and corrugated aluminium. The main aim of an Order System dealer is to create a cavity between the body of the van and the lining, so that in case of a violent collision caused by the overturning of the material, the bodywork would not be damaged. They substitute the fragile linings made of carton already supplied by the van-producer, and they cover the areas of the van that remain exposed. They do not substitute the original shaped, plastic linings. Order System linings are fixed to the body of the van with self-perforating screws or tearing rivets. Before fixing the lining some silicon is applied in order to avoid any possible vibration. The complete lining is composed by left side, right side and lower rear doors, while the upper rear doors have to be ordered separately, because they can be blind or gridded for windows, depending on the model of the van and the customer's need.

#### VERKLEIDUNGEN

Die Verkleidungen der Innenwände der Nutzfahrzeuge sind aus geformten und gelochten Paneelen zusammengestellt und sind aus vorlackiertem Blech, Aluminium und gewölbten Aluminium hergestellt. Die Hauptfunktion der Order System Verkleidung ist die Schaffung eines Freiraumes zwischen Fahrzeug-Karosserie und Verkleidung, so dass im Falle eines heftigen Schlages, verursacht durch Umfallen der Ware, die Karosserie nicht beschädigt wird. Die Verkleidungen ersetzen die von den Autohäusern vorgesehenen zerbrechlichen Kartonverkleidungen. Sie ersetzen nicht die geformten, originalen Plastikverkleidungen. Order System Verkleidungen werden an der Fahrzeug-Karosserie durch Schrauben oder Reißnieten befestigt. Vor der Befestigung wird Silikon angebracht, um mögliches Flattern zu verhindern. Die gesamte Verkleidung besteht aus linke Seite, rechte Seite und untere Teile der Rücktüren, während die oberen Teile der Rücktüren separat bestellt werden müssen, da sie blind oder vergittert für Scheiben sein können, passend zum Fahrzeug oder den Bedürfnissen des Kunden.

#### PARATIE DIVISORIE

Le paratie divisorie compiono la funzione di proteggere lo schienale della cabina e vengono realizzati in alluminio mandorlato perché questa zona di transizione è esposta agli urti quindi deve essere il più possibile rinforzata.

#### DIVIDING BULKHEAD

Dividing bulkheads are useful to protect the back of the driver's cab and are made of corrugated aluminium, because this transition area is exposed to the impacts, so it must be strengthened in the best way.

#### TRENNSCHOTT

Trennschotte dienen zum Schutz der Kabinenrückwand und sind aus gewölbten Aluminium hergestellt. Dieser Teil des Fahrzeuges muss besonders verstärkt sein, da er sehr Stößen ausgesetzt ist.

#### COPRIRUOTA

I copriruota servono per proteggere il passaruota del furgone da urti e sono realizzati da una parte superiore in acciaio zincato e da una parte frontale in alluminio mandorlato.

#### WHEELHOUSE COVER

Wheelhouse covers are used to protect the wheel cover from the impacts. Their upper part is made of galvanized steel, while the frontal part of corrugated aluminium.

#### RADKASTENSCHUTZ

Der Radkastenschutz dient dem Schutz des Radkastens vor Stößen und ist an der oberen Seite aus verzinktem Stahl und an der Frontseite aus gewölbten Aluminium hergestellt.

I pianali, i rivestimenti e i passaruota sono disponibili per i seguenti modelli:

#### VALIGIE

La gamma di valigie Order è studiata secondo le esigenze di professionisti, infatti le sue misure nei vari modelli garantiscono il trasporto di qualsiasi accessorio, grazie anche alle varie possibilità di combinazioni delle vaschette interne. La struttura delle valigie è realizzata in acciaio 10/10 e verniciata a polveri poliesteri.

Sono dotate di cricchetti di chiusura lucchettabile, maniglia ergonomica e chiusura di sicurezza, realizzati in acciaio per garantire una durata nel tempo. All'interno del coperchio viene applicata una spugna per sigillare le vaschette quando la valigia è chiusa.

#### CASES

The range of Order cases is studied according to the professional requirements, in fact its measures in the various models guarantee the carriage of any accessory, thanks also to the various combination possibilities of the internal containers. The structure of the cases is made of steel 10/10 and varnished with polyester powders. They are provided with closing ratchet that can be sealed with padlocks, ergonomic handles and safety locks, made of steel to guarantee time wear. On the inside there is a sponge to seal up the containers when the case is closed.

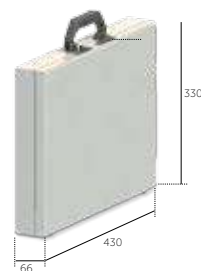

#### KOFFER

Die Kofferserie Order wurde gemäß den Bedürfnissen der Kunden angepasst. Durch die unterschiedlichen Maße der verschiedenen Modelle und aufgrund der variablen Zusammensetzung der Innenbehälter ist der Transport von vielem verschiedenen Zubehör möglich. Die Koffer sind aus 10/10 Stahl produziert und mit Polyester Pulver beschichtet. Sie sind mit einem verriegelbarem Schloss aus Stahl, ergonomischem Griff und Sicherheitsschloss ausgestattet.

Im Deckel des Koffers wird ein Schaumgummi aufgeklebt um die Behälter, wenn der Koffer geschlossen ist, abzudichten.

#### CASSETTIERE

Le cassettiere Order sono state progettate per l'arredamento dei furgoni, quindi come principali caratteristiche struttive hanno: robustezza, leggerezza, intercambiabilità dei cassetti, guide ad estrazione totale e doppia chiusura del cassetto per garantire la massima sicurezza in movimento. Le cassettiere Order offrono la possibilità di avere delle combinazioni di soli cassetti, di soli vassoi con valigie estraibili o combinazioni di cassetti e vassoi valigie. Le cassettiere Order con cassetti sono disponibili in tre larghezze 507-760-1014 due altezze 241-483 e due profondità 360-410. I cassetti sono disponibili in tre larghezze 507-760-1014 mm e in quattro altezze 66-100-130-200mm e dotati di chiusura centrale per un miglior serraggio e sono muniti di tappetino antiolio, antivibrazione e i divisori interni sono realizzati in alluminio. Essi possono essere smontati facilmente in modo tale da poter variare la composizione ogni qual volta si voglia. **Disponibili anche in alluminio.**

#### CHEST OF DRAWERS

Order chest of drawers have been designed for van's equipment, therefore their main characteristics are: strength, lightness, drawers interchangeability, guides with total extraction and double locked drawers in order to guarantee the maximum safety in movement. Order chests of drawers offer the possibility to create combinations of drawers only, trays with portable cases only, or finally combinations of drawers and trays with cases. Order boxes with drawers are available in three widths 507-760-1014 two heights 241-483 and two depths 360-410. The drawers are available in three widths 507-760-1014 mm and four heights 66-100-130-200mm, they are provided with central lock in order to guarantee a good fixing of cargo and with anti-oil and anti-vibration carpets, the internal partitions are made in aluminium. They can be easily removed in order to change and vary the composition at any time. **These components are available both in Steel and Aluminum.**

#### SCHUBKÄSTEN

Order Schubkästen zeichnen sich durch ihre Stabilität, Leichtigkeit und Austauschbarkeit aus. Die Schubkästen sind mit voll ausziehbaren Führungsschienen. Order Schubkästen zeichnen sich durch ihre Stabilität, Leichtigkeit und Austauschbarkeit aus. Die Schubkästen sind mit voll ausziehbaren Führungsschienen und beidseitiger Arretierung ausgestattet, durch die eine hohe Sicherheit während der Fahrt gewährleistet ist. Order Schubkästen bieten die Möglichkeit verschiedener Zusammensetzungen: nur Schubladen, nur Koffertablar oder Schubladen und Koffertablar zusammen. Order die Möglichkeit verschiedener Zusammensetzungen: nur Schubladen, nur Koffertablar oder Schubladen und Koffertablar zusammen. Order Schubkästen für Schubladen stehen in drei Breiten 507 mm – 760 mm -1014 mm, zwei Höhen 241 mm – 483 mm und zwei Tiefen 360 mm – 410 mm zur Verfügung. Die Schubladen stehen in drei Breiten 507-760-1014 mm und vier Höhen 66-100-130-200 mm zur Verfügung und sind mit Zentralverriegelung für eine bessere Schließung ausgestattet und mit einer Antirutsch-Matte versehen. Die inneren Trennwände sind aus Aluminium hergestellt. Die Schubladen können leicht demontiert werden, um die Aufteilung der Schubladen zu wechseln. **Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.**

#### CASSETTI CON DOPPIE GUIDE

Le guide sono a sfera ad estrazione totale per permetterne il miglior utilizzo di lavoro. Nei cassetti con altezza 130 e 200mm è possibile montare due coppie di guide duplicando portata e robustezza.

#### CHEST OF DRAWERS WITH DOUBLE GUIDES

The guides are all spherical for total extraction allowing the best use of the drawers. In the drawers with height 130 and 200mm is possible to fix two pairs of guides, obtaining in that way double capacity and strength.

#### SCHUBLÄDEN MIT DOPPEL FÜHRUNGSSCHIENEN

Die Führungsschienen sind kugelgelagert mit Vollauszug. An den Schubläden mit Höhe 130 und 200 mm kann man 2 Paar Führungsschienen montieren, um die Traglast zu erhöhen.

#### CASSETTIERE CON VASSOI VALIGIE

Le cassettiere con vassoi valigie sono disponibili in due larghezze 507-1014 mm, in due altezze 241-483 e in due profondità 360-410 e possono avere un minimo di N. 2 vassoi e un max. di N. 4 vassoi. Essi sono realizzati completamente in acciaio alleggerito, per garantire robustezza e leggerezza. Le guide sono a sfere ad estrazione totale per asportare senza problemi la valigia riposta sul vassoio. La chiusura del vassoio è sempre centrale per garantire un buon fissaggio del carico. Il vassoio da 1014 è in grado di contenere al suo interno due valigie.

#### BOXES WITH TRAYS AND CASES

Boxes with trays and cases are available in the following dimensions: 507-1014 mm wide, 241-483 high and 360-410 deep and they can have from a minimum of 2 to a maximum of 4 trays. They are entirely made of lightened steel, in order to guarantee strength and lightness at the same time. The guides are all spherical for total extraction in order to take away the case placed on the tray without problem. The lock of the tray is always in the middle in order to guarantee a good fixing of cargo. The 1014 tray can keep two cases.

#### SCHUBKÄSTEN MIT KOFFERTABLAR

Schubkästen für Koffertablar stehen in zwei Breiten 507mm- 1014 mm, zwei Höhen 241mm-483mm und zwei Tiefen 360mm-410mm zur Verfügung und können mit 2- 4 Kofferträgern ausgestattet werden. Sie sind vollständig aus Aluminium hergestellt um gleichzeitig Stabilität und Leichtigkeit zu gewährleisten. Die Führungsschienen sind kugelgelagert und mit Vollauszug, um den Koffer leicht zu entnehmen. Die Verriegelung des Trägers ist immer zentral, um eine gute Verteilung der Last zu garantieren. Der 1014mm Träger beinhaltet 2 Koffer.

**CASSETTIERE CON CASSETTI BASCULANTI**

Le Cassettiere con cassetti basculanti Order permettono di stivare tutti i tipi di minuterie in massima sicurezza, e rendere visibile il contenuto grazie ai suoi cassetti trasparenti. I cassetti sono disponibili in 4 grandezze che si possono combinare tra loro secondo l'esigenza del cliente. Tutti i cassetti sono asportabili e muniti di chiusura di sicurezza.

**DRAWER UNIT WITH BALANCING DRAWERS**

Order drawer boxes with balancing drawers allow to stow all kinds of odds and ends in the most safety way, and seeing what is inside thanks to their transparent drawers. The drawers are available in four different sizes that can be combined each other according to the customer's need. All drawers are removable and provided with safety lock.

**KIPPBOX-REGALE**

Order Kippboxen-Regale ermöglichen leichtes sicheres Verstauen jeglicher Kleinsteile. Dank der durchsichtigen Boxen ist der Inhalt leicht erkennbar. Die Boxen stehen in 4 Größen zur Verfügung und sind untereinander kombinierbar. Die Regale sind mit einem Sicherheitsbügel verschlossen. Die Kippboxen sind einzeln entnehmbar.

**TELAIO CASSETTI BASCULANTI**

Telaio porta cassetti basculanti realizzato in lamiera.

**FRAME FOR BALANCING DRAWERS**

Empty frame for balancing drawers made of iron plate.

## ARMADI

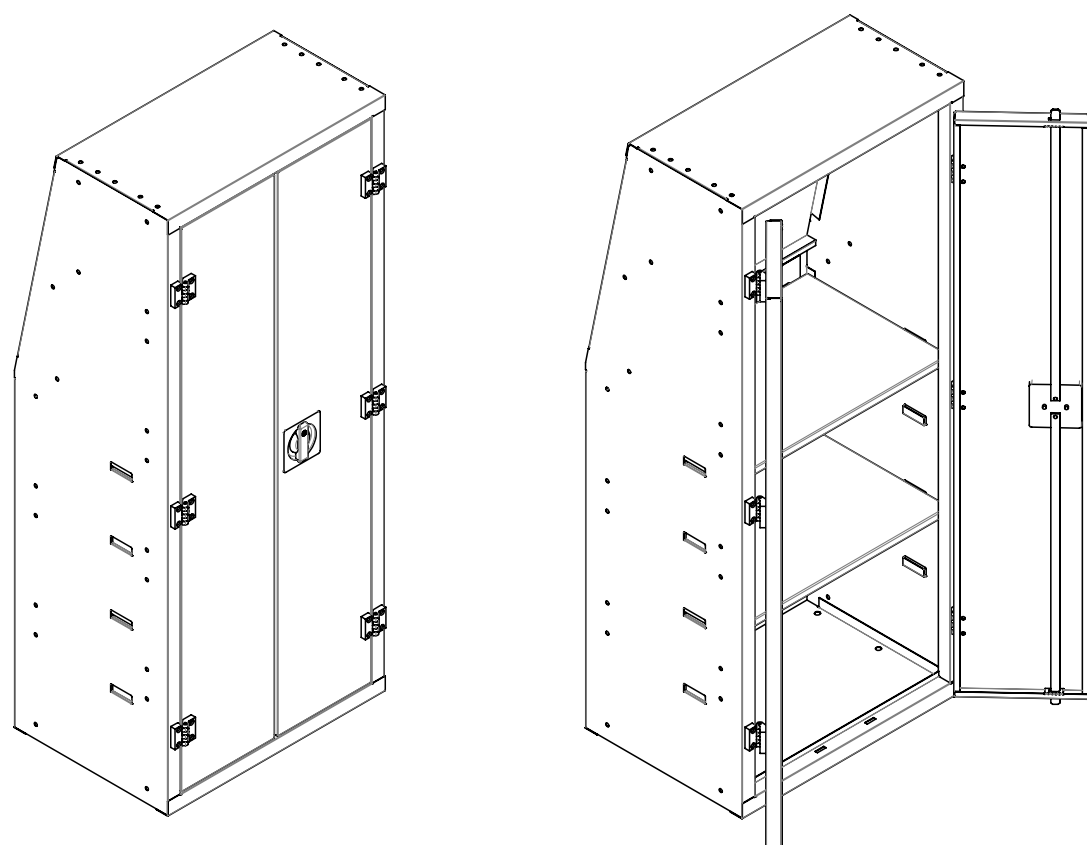

Gli armadi Order, sono realizzati completamente in acciaio e alluminio verniciato, e sono realizzati in quattro versioni di grandezza per soddisfare ogni esigenza. Sono disponibili in larghezza da 507 mm, in quattro altezze 483-724-966-1.207 mm e in due profondità 360-410 mm. Gli armadi sono forniti di doppia antina per ridurre lo spazio di apertura, e la chiusura è triplice per garantire un perfetto serraggio. All'interno sono muniti di ripiani regolabili, o di astine appendiabiti. Gli armadi con altezza 724-966-1.207 mm hanno la parte superiore più stretta in quanto il fianco dell'armadio è a forma trapezoidale in modo da seguire le curvature del furgone.

## CUPBOARD UNITS

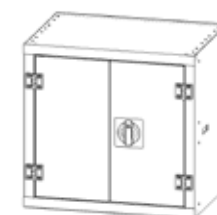

Order cupboard units are completely made by steel and painted aluminium and are available in four different sizes to satisfy all needs. The available dimensions are: 507 mm W., 483-724-966-1.207 mm H. and 360-410 mm D. The cupboards are supplied with double door to reduce the door span and triple locking to guarantee a perfect closing. Inside they are provided with adjustable shelves or coat hanger bars. The cupboard units with height 724-966-1.207 mm have the top tighter than the bottom, because the side of the unit has the shape of a trapezium in order to follow the bending of the van.

## SCHRÄNKE

Order Schränke sind vollständig aus Stahl und lackierten Aluminium in vier Maßen erhältlich. Sie stehen mit einer Breite von 507 mm, in vier Höhen 483-724-966-1207 mm und zwei Tiefen 360-410, zur Verfügung. Die Schränke sind mit Flügeltüren versehen um den Öffnungsraum zu reduzieren. Die Schränke sind zur Sicherung mit einem Schloss versehen. Für alle Schränke sind Regalböden und Kleiderstangen erhältlich. Ab einer Höhe von 724 mm werden die Schränke nach oben verjüngt.

#### **COPRIPASSARUOTA**

Il copripassaruota è un elemento che ci permette di montare e allineare tutti i componenti ORDER sopra di esso e ricava delle comode zone di carico. Essi si possono avere in tre versioni: aperto, con antina e con serranda.

#### **WHEELHOUSE COVER**

The wheelhouse cover is a part of the equipment that permits to assemble and align upon it all ORDER pieces. It also permits to obtain convenient loading areas. The available models are three: open wheelhouse cover, wheelhouse cover with door and wheelhouse cover with roll up.

#### **RADKASTENVERKLEIDUNGEN**

Die Radkastenverkleidung ist das Basiselement der ORDER Fahrzeugeinrichtung, auf der alle weiteren Komponenten aufgebaut werden. Es stehen drei verschiedene Varianten zur Verfügung: Offene Radkastenverkleidung, Radkastenverkleidung mit Tür, Radkastenverkleidung mit Rolladen.

COPRIPASSARUOTA APERTO

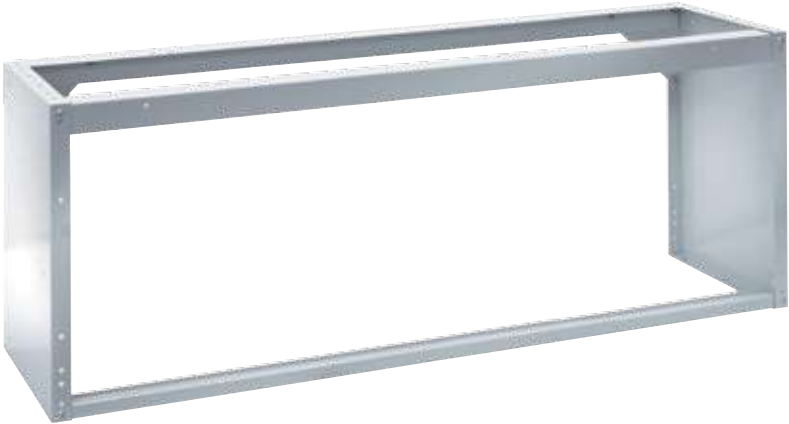

Copripassaruota aperto è il più semplice visto che è composto solo da due fianchi, due triangoli di rinforzo e tre angolari

OPEN WHEELHOUSE COVER

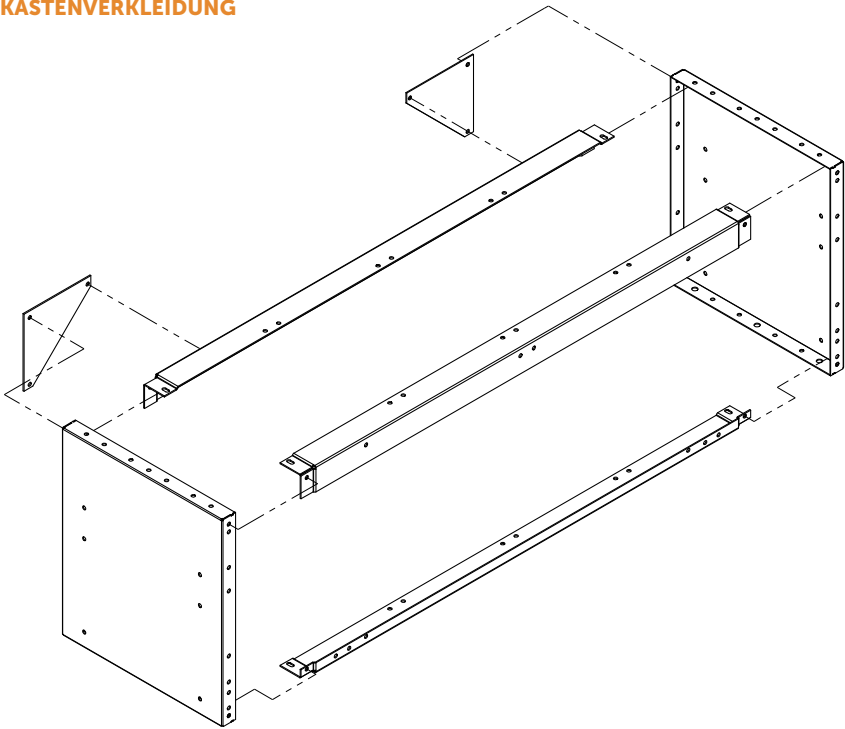

The open wheelhouse cover is the simplest model, as only the two sides, two reinforcement triangles and three angle pieces compose it.

OFFENE RADKASTENVERKLEIDUNG

Die offene Radkastenverkleidung ist das Grundmodell. Sie besteht aus zwei Flanken, zwei Verstärkungsdreiecken und drei Winkelprofilen.

**CHIUSURA POSTERIORE E INFERIORE**

I copripassaruota possono anche svolgere la funzione di vani porta oggetti, inserendo la chiusura posteriore e inferiore si creano dei comodi vani di carico e possono essere applicati in qualsiasi punto dell'allestimento.

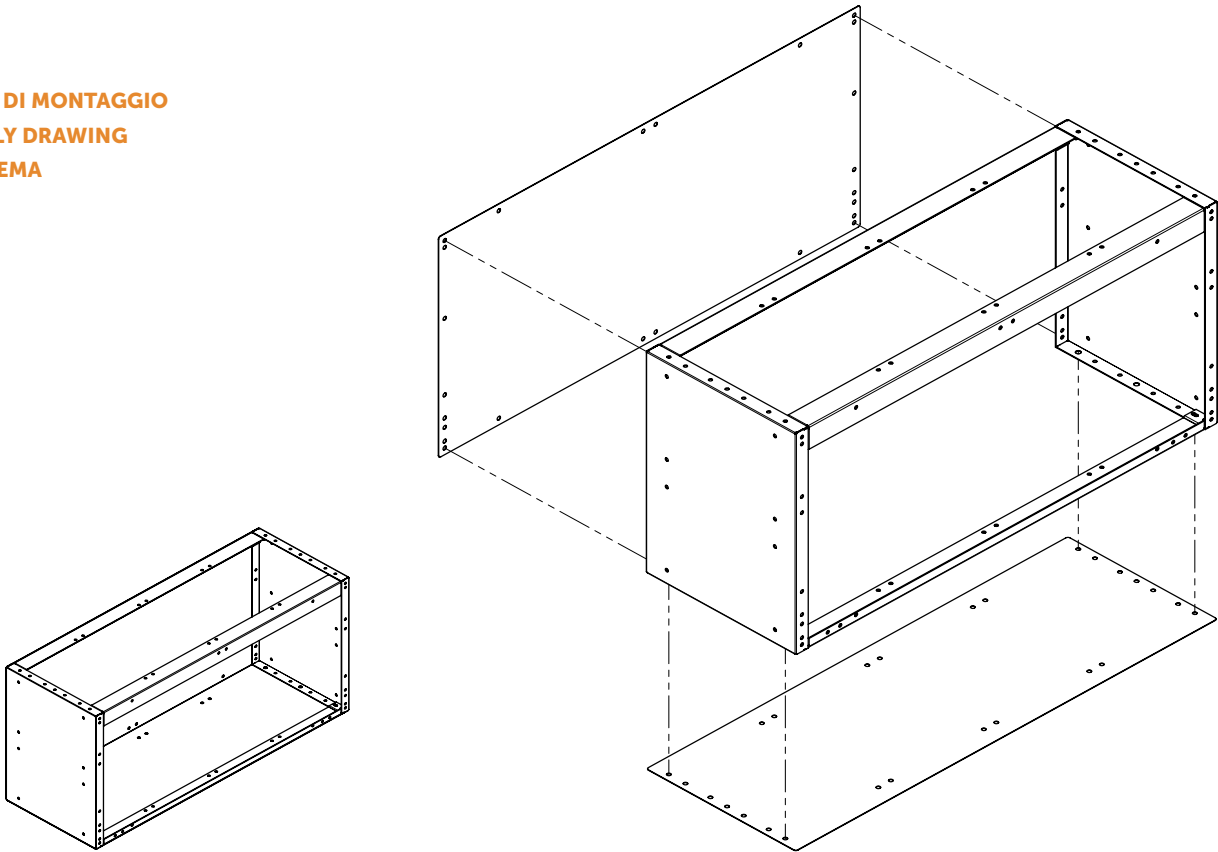

**UPPER-LOWER CLOSING PANEL**

Wheelhousecovers can also be used as glove compartment. Convenient charging areas, indeed, can be created in any point of the equipment just by inserting an upper/lower closure.

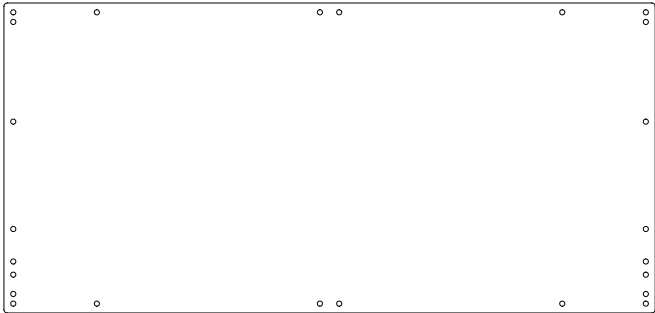

**SCHLIESSUNGSPANEL**

Die Radkastenverkleidungen können auch als Staufach genutzt werden. Mit dem Schließungspannellen oben/unten und hinten/vorne kann man an einem beliebigen Punkt der Fahrzeugeinrichtung einen nützlichen Laderaum erzeugen.

**KIT FERMAVALIGIE**

Il kit va applicato all'interno dei copripassaruota aperti ed è composto da una navetta di bloccaggio, un contro fianco e una rotaia. La navetta permette di tenere bloccate le valigie al fianco del copripassaruota impedendone qualsiasi movimento.

Il suo pregio è quello di poter alloggiare varie dimensioni di valigie.

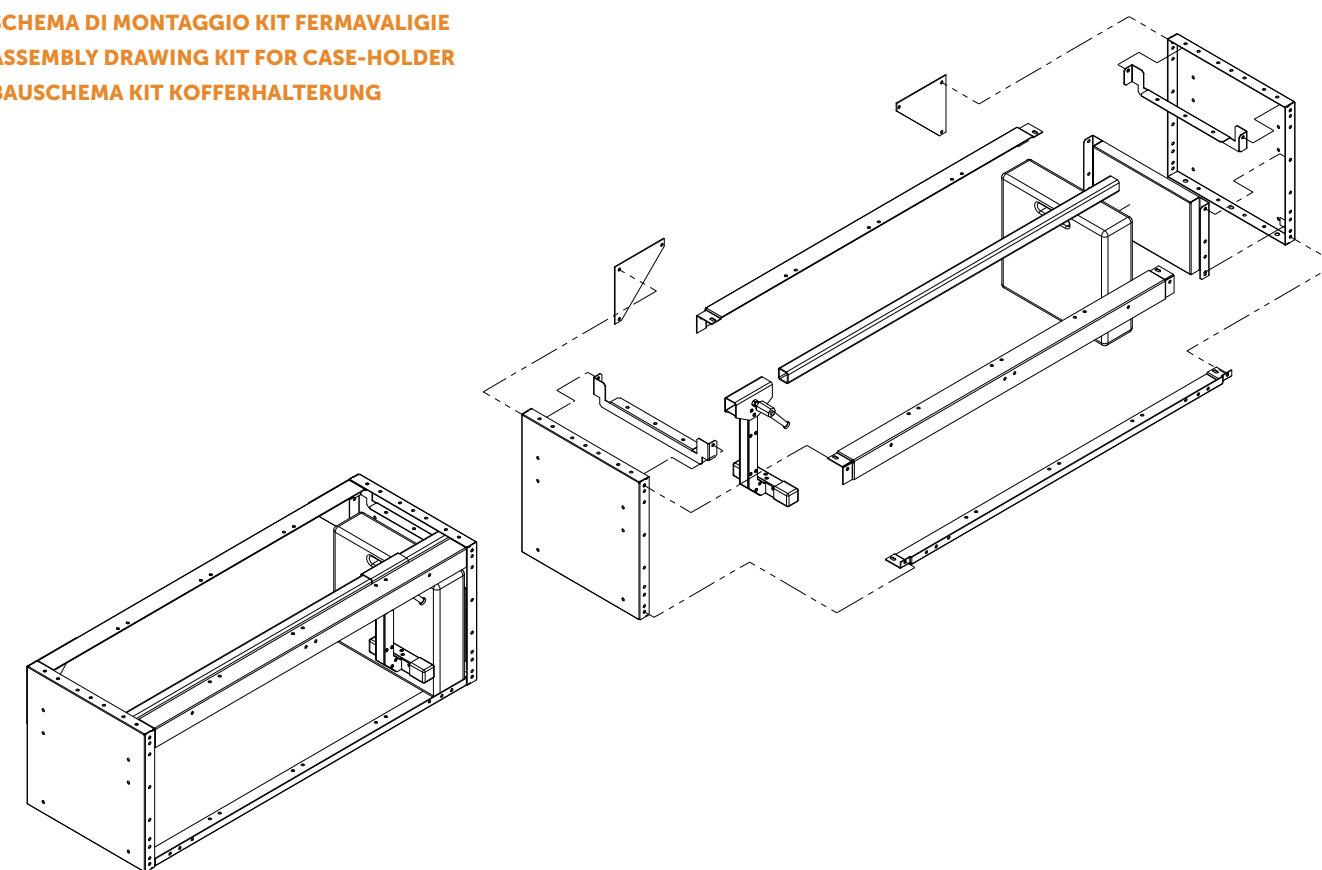

**KIT FOR CASE-HOLDER**

The kit has to be applied inside the open wheelhouse cover and is composed of a blocking-shuttle, a counter-side and a rail. The rail permits to keep the cases blocked against a side of the wheelhouse, avoiding them to move. Its positive aspect is that it can accommodate cases of various dimensions.

**KIT KOFFERHALTERUNG**

Das Kit wird an der Innenseite der offenen Radkastenverkleidung montiert und besteht aus einem Spannhebel, einem Anschlag und einer Führungsschiene. Der Spannhebel drückt die Koffer an den seitlichen Anschlag der Radkastenverkleidung und verhindert jede Bewegung. So können Sie verschieden große Koffer nebeneinander verstauen.

SCAFFALATURE CON DIVISORI

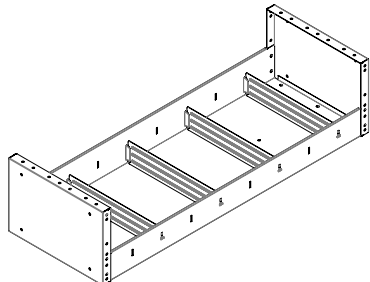

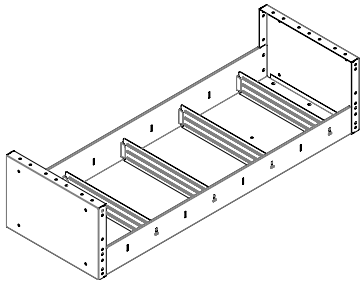

Le scaffalature ORDER sono realizzate con una struttura portante in acciaio di alto spessore per sorreggere e stivare qualsiasi carico in sicurezza. I tappetini antiolio sono di serie insieme ai divisori. Per contenere il peso della scaffalatura i divisori sono realizzati in alluminio. Sono disponibili in sei lunghezze 253-507-760-1014-1268-1521mm, 6 altezze 161-241-362-402-444-483 mm e in 4 profondità 260-320-360-410 mm. Disponibili anche in alluminio.

SHELVINGS WITH PARTITIONS

ORDER shelvings are made of a supporting high thickness-steel structure so to stow any load in safety. The anti-oil carpets and the partitions are production models. The partitions are made in aluminium in order to limit the shelving's weight. The shelves are available in six widths 253-507-760-1014-1268-1521mm, 6 heights 161-241-362-402-444-483 mm and in 4 depths 260-320-360-410 mm. These components are available both in Steel and Aluminum.

REGALE MIT TRENNWÄNDEN

ORDER Regale sind aus hochwertigem Stahl hergestellt, um jede Last sicher zu tragen. Die Antirutsch-Matten sowie die Trennwände sind serienmäßig. Um das Gewicht der Regale zu reduzieren, sind die Trennwände aus Aluminium hergestellt. Die Regale stehen in 6 Längen 253-507-760-1014-1268-1521 mm, in 6 Höhen 161-241-362-402-444-483 mm und in 4 Tiefen 260-320-360-410 mm zur Verfügung. Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.

#### SCAFFALATURE H16

Le nuove scaffalature ORDER H16 sono realizzate con una struttura portante in acciaio. Esse sono state studiate per riporre i materiali più ingombranti, valigie, scatole e altro. Il bordo anteriore del ripiano è alto 16mm e quello posteriore di 56mm. I tappetini anti olio sono di serie. Sono disponibili in 5 lunghezze 507-760-1014-1268-1521mm e 5 altezze 241-362-402-444-483 mm con una profondità di 360 mm.

**Disponibili anche in alluminio.**

#### SHELVINGS H16

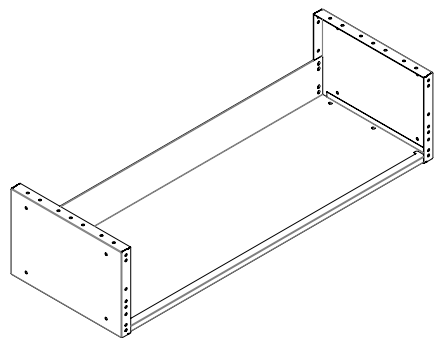

The new ORDER shelvings H16 are made of a steel supporting structure. They have been designed to store bulky materials, cases, boxes and more. The front edge of the shelf is 16mm high and the rear one is 56mm. Anti-oil mats are standard. The shelves are available in 5 lengths 507-760-1014-1268-1521mm and 5 heights 241-362-402-444-483 mm with a depth of 360 mm.

**These components are available both in Steel and Aluminum.**

#### REGALE H16

Die neuen ORDER SYSTEM Regale H16 sind aus einer Stahltragkonstruktion konzipiert. Sie dienen dazu auch die sperrigsten Materialien wie Koffer, Boxen und vieles mehr zu lagern. Die vordere Kante des Regals ist 16 mm hoch und die hintere 56 mm. Die Antirutschmatten sind serienmäßig eingelegt. Die Regale sind in fünf Längen 507-760-1014-1268-1521 mm und in fünf Höhen 241-362-402-444-483 mm mit einer Tiefe von 360 mm verfügbar. **Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.**

SCAFFALATURE CON CONTENITORI IN PLASTICA ASPORTABILI

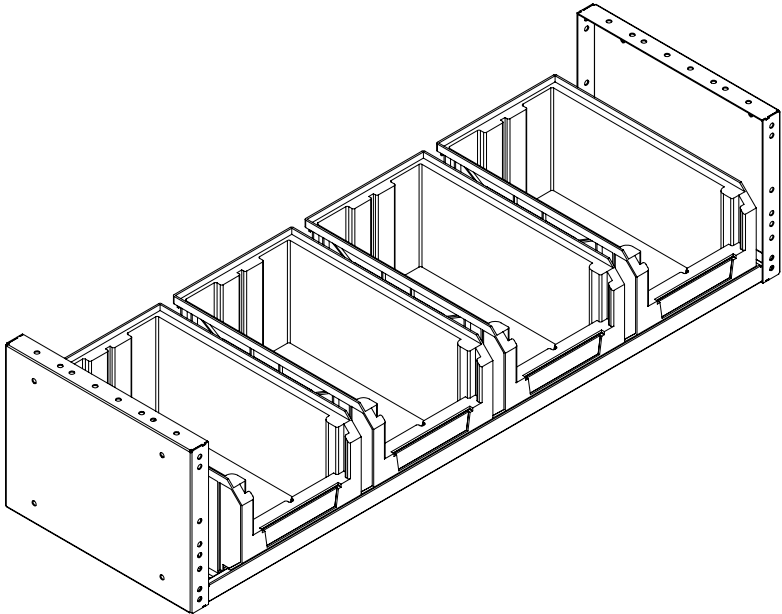

Le scaffalature Order con contenitori in plastica asportabili sono realizzate con una struttura in acciaio di alto spessore fatte in modo da tenere ancorati i contenitori anche in movimento. Le scaffalature sono disponibili in 5 lunghezze, 507-760-1014-1268-1521 mm , in 2 altezze 161-241 mm e in 3 profondità 260-320-360 mm. I contenitori in plastica sono disponibili in tre modelli K3-K4-K4D e sono tutti asportabili.  
Disponibili anche in alluminio.

SHELVINGS WITH REMOVABLE PLASTIC CONTAINERS

Order shelvings with removable plastic containers are made of a high-thickness steel structure so to keep the trays anchored while the vehicle moves. They are available in 5 widths, 507-760-1014-1268-1521 mm , 2 heights 161-241 mm and 3 depths 260-320-360 mm. The plastic containers, all removable, are available in three models: K3-K4-K4D. **These components are available both in Steel and Aluminum.**

REGALE MIT HERAUSNEHMBAREN PLASTIKBEHÄLTERN

Order Regale mit herausnehmbaren Plastikbehältern sind aus hochwertigem Stahl hergestellt und sind so konstruiert, dass die Behälter auch während der Fahrt verankert bleiben. Sie sind in 5 Längen 507-760-1014-1268-1521 mm, in 2 Höhen 161-241 mm und in 3 Tiefen 260-320-360 mm verfügbar. 3 Größen von Plastikbehältern stehen zur Verfügung. **Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.**

Le scaffalature terminali con contenitori in plastica asportabili sono da utilizzare come ultimo elemento nelle diverse composizioni. Variano dalle normali scaffalature con vaschette in quanto sprovviste dei fianchi laterali per ridurre l'ingombro. Sono disponibili in 5 lunghezze 503-760-1014-1268-1521 mm , in 2 altezze 125-170 mm , e in 2 profondità 260-320 mm. **Disponibili anche in alluminio.**

Terminal shelvings with removable plastic containers have to be used in the various equipments as the last element of a composition. They are different from the normal shelvings with containers, because they don't have the lateral sides convenient for reducing the volume. These shelvings are available in 5 widths 503-760-1014-1268-1521 mm, 2 heights 125-170 mm and 2 depths 260-320 mm. **These components are available both in Steel and Aluminum.**

Die Abschlussregale mit herausnehmbaren Plastikbehältern sind als letztes Element in den Fahrzeugeinrichtungen zu benutzen. Sie unterscheiden sich von den normalen Regalen mit Behältern da sie nicht über Seitenwände verfügen, um so den Raumbedarf zu reduzieren. Sie sind in 5 Längen 503-760-1014-1268-1521 mm, in 2 Höhen 125-170 mm und in 2 Tiefen 260-320mm verfügbar. **Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.**

SCAFFALATURE CON CONTENITORI H100

Le scaffalature Order con contenitori in plastica H100 sono realizzate con una struttura in acciaio di alto spessore fatte in modo da tenere ancorati i contenitori anche in movimento. Le scaffalature sono disponibili in 5 lunghezze, 507-760-1014-1268-1521 mm , in 2 altezze 161-241 mm e con la profondità di 320 mm. I contenitori in plastica sono disponibili in due modelli 9101-9103 e sono tutti asportabili.

Disponibili anche in alluminio.

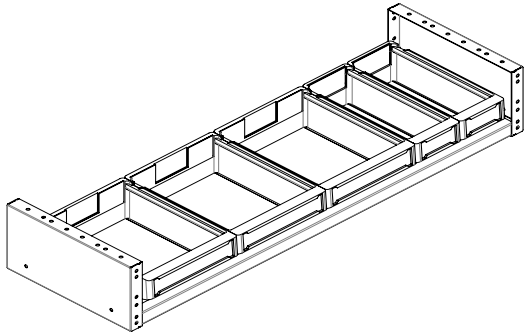

SHELVING WITH CONTAINERS H100

Order shelvings with containers H100 are made of a high thickness steel structure in order to hold the containers well anchored while the vehicle moves. The shelves are available in 5 lengths, 507-760-1014-1268-1521 mm, 2 heights 161-241 mm and a depth of 320mm. The plastic containers are available in the two models 9101-9103 and are all removable. **These components are available both in Steel and Aluminum.**

REGALE MIT HERAUSNEHMBAREN PLASTIKBEHÄLTERN H100

Order Regale mit herausnehmbaren Plastikbehältern H100 sind aus hochwertigem Stahl hergestellt und sind so konstruiert, dass die Behälter auch während der Fahrt verankert bleiben. Sie sind in 5 Längen 507-760-1014-1268-1521 mm, in 2 Höhen 161-241 mm und in 1 Tiefe 320 mm verfügbar. Zwei Modelle von Plastikbehältern, 9101und 9103, stehen zur Verfügung.

Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.

SCAFFALATURE CON ANTINA H101 E TAPPETINO

La scaffalatura con antina H101 è l'ideale per stivare il carico in modo ordinato e sicuro impedendo che questo si muova o cada dall'allestimento. Il ripiano è realizzato in acciaio mentre l'antina è in estruso di alluminio e una volta aperta rimane allineata rispetto al piano di appoggio, si potrà estrarre ciò che è stato riposto senza alcuna fatica. La scaffalatura con antina H101 è una soluzione resistente, leggera e pratica, disponibile in varie dimensioni per soddisfare qualsiasi esigenza. Il ripiano è prodotto anche nella versione alluminio.

Disponibili anche in alluminio.

SHELF FOR CLOSING DOOR H101 AND RUBBER MAT

The rack with door H101 is ideal for safe and organised storage of materials and prevent them from shifting or falling off. The rack is made of steel while the door is made of extruded aluminium and when opened, stays aligned with the shelf. You can take out materials without any problem. The rack with door H101 is a durable lightweight and practical solution, available in different sizes to meet every storage need. The rack is also produced in aluminum **These components are available both in Steel and Aluminum.**

REGALE MIT TÜR H101 UND MATTE

Die Regale mit der Tür H101 sind ideal, um Lasten ordentlich und sicher zu verstauen, ohne Gefahr zu laufen, dass sie sich bewegen oder von der Installation fallen. Das Regal ist aus Eisen, während die Tür aus extrudiertem Aluminium ist. Sobald die Tür geöffnet ist, bleibt sie auf gleicher Höhe mit der Lastenfläche und man kann problemlos alles entladen. Die Regale mit der H101-Tür sind eine dauerhafte, leichte und praktische Lösung, erhältlich in verschiedenen Größen, um allen Bedürfnissen gerecht zu werden. Das Regal wird auch in Aluminium-Version hergestellt.

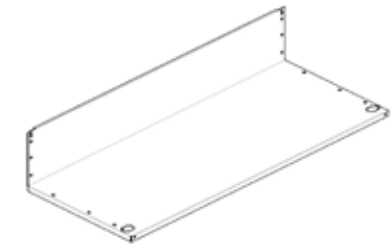

Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.

### SCAFFALATURE PORTA BOMBOLE

La nuova scaffalatura porta-bombole Order System, è adatta per tutti coloro che hanno l'esigenza di trasportare bombole nel proprio veicolo. Con lo speciale scaffale rinforzato è possibile sistemare e fissare in modo sicuro diverse bombole. Anche in caso di una brusca frenata il materiale rimane al suo posto senza allocare danni a persone o cose.

### CYLINDERS' SHELVING

The new Order System shelving for cylinders is suitable for everyone who needs to carry cylinders on their vehicle. Thanks to the special strengthened shelf it's possible to install and fix several cylinders in a safe way. Even in case of an abrupt braking anything moves and damages people or things inside the vehicle.

### REGALE FÜR KÄLTEMITTELTRANSPORT

Diese Order System Regale sind ideal für den Transport von Kältemittelflaschen und Ähnlichem geeignet. Mit dem extra verstärkten Regalboden kann man mehrere Flaschen gleichzeitig sicher lagern und transportieren. Durch Sicherung der Flaschen mit Spanngurten, bleibt das Material auch bei plötzlichem bremsen auf seinem Platz ohne Personen- oder Sachbeschädigungen zu verursachen.

#### GRONDAIE

La grondaia allungabile è un elemento terminale totalmente realizzato in acciaio che funge la funzione di contenitore per tubi, canaline, aste e altri oggetti allungati. Sono disponibili in diverse lunghezze da un minimo di 1.014 a un massimo di 4.056 mm, 2 altezze 80-100 e in 3 profondità 220-260-320 mm. **Disponibili anche in alluminio.**

#### GUTTERS

The extendable gutter is a terminal item completely made of steel, which is useful to carry tubes, poles and other long things. Gutters are available in different widths, starting from a minimum of 1.014 to a maximum of 4.056 mm, in 2 heights 80-100 and 3 depths 220-260-320 mm.

**These components are available both in Steel and Aluminum.**

#### AUSZIEHBARE RINNEN

Die ausziehbare Rinne ist ein vollständig aus Stahl hergestelltes Endelement. Sie dient dem Transport von langen Rohren, Stangen und anderen sperrigen Gegenständen. Ausziehbare Rinnen sind in verschiedenen Längen zwischen 1014-4056 mm, in 2 Höhen 80-100 mm und in 3 Tiefen 220-260-320 mm verfügbar. **Diese Komponenten sind sowohl in Stahl als auch in Aluminium erhältlich.**

#### FIANCO PER GRONDAIE

Il Fianco per Grondaia permette di installare sul vostro furgone più grondaie sovrapposte, in modo da ottenere dei comodi vani di alloggiamento per materiali di varie lunghezze, come tubi, profili, corrugati, materiali da lavoro ecc. Esso è utilizzabile solo con grondaie aventi profondità 320mm.

#### GUTTER'S SIDE

The gutter's side allows to install in your vehicle several gutters one upon the other, in order to gain more space for keeping materials of different lenght, such as pipes, profiles, working materials, and so on. This can be used only with gutters 320 mm deep.

#### FLANKEN FÜR AUSZIEHBARE RINNEN

Die Flanken erlauben Ihnen in Ihrem Fahrzeug mehrere Rinnen übereinander zu montieren. Dadurch erhalten sie Mehrere durchgängige Regale mit einer Höhe von 36cm für lange Rohre, Stangen und größere, sperrige Gegenstände. Die Flanken sind in einer Tiefe von 360mm verfügbar.

#### PIANE DI LAVORO IN LEGNO

Le piane di lavoro vengono realizzate in multistrato da 20mm trattate anti-olio. Vengono ancorate tramite apposite viti agli altri componenti Order offrendone la massima stabilità e robustezza. Sono disponibili in cinque lunghezze 507-760-1014-1268-1521mm, in due profondità 360-410, e si possono richiedere con bordi e senza bordi.

#### WOOD WORKTOP

The worktops are made of anti-oil treated, 20mm thick marine multi-layer. They are fixed to the other Order elements with appropriate screws, offering the maximum stability and strength. They are available in five widths 507-760-1014-1268-1521mm, two depths 360-410, and can be ordered with or without edges.

#### HOLZARBEITSPLATTEN

Die Arbeitsplatten werden aus 20 mm Multischichtholz mit Anti-Ölimp-rägnierung gefertigt. Sie werden mit passenden Schrauben an den anderen Order Elementen befestigt, um maximale Stabilität und Stärke zu bieten. Sie stehen in fünf Längen 507-760-1014-1268-1521 mm, zwei Tiefen 360-410 zur Verfügung und man kann sie mit oder ohne Rand bestellen.

#### PIANA IN LEGNO SENZA BORDI

Piana in legno senza bordi in multistrato da 20mm antiolio.

#### WOODTOP WITHOUT EDGES

Wood top in multi-layer, 20mm thick, anti-oil.

#### HOLZPLATTE OHNE RÄNDER

Multischichtholzplatte 20 mm mit Anti-Ölimprägnierung, ohne Rand

#### PIANA IN LEGNO CON BORDI

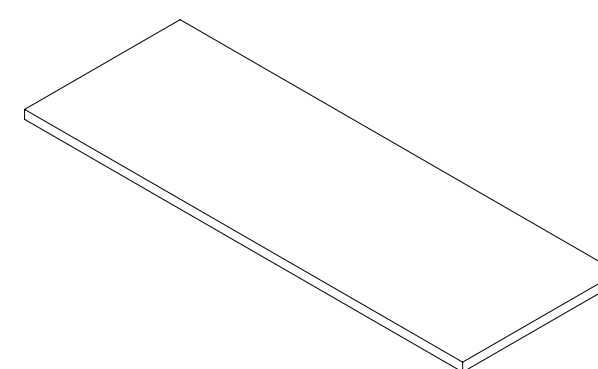

Piana in legno in multistrato da 20mm antiolio, con bordi laterali e posteriore da 40 mm in modo da impedire la caduta del materiale sopraposto.

#### WOODTOP WITH EDGES

Wood top in multi-layer, 20mm thick, anti-oil, with lateral and rear edges, 40 mm thick, useful to avoid the falling down of the material put on it.

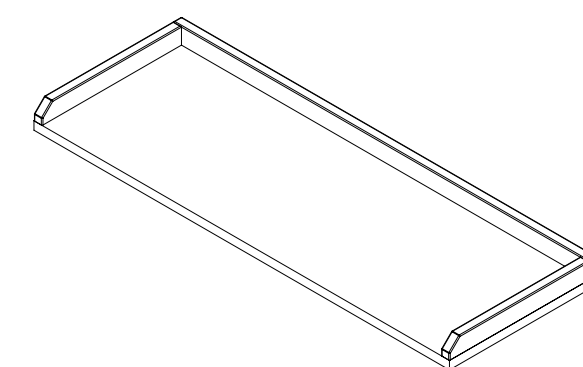

#### HOLZPLATTE MIT RÄNDERN

Multischichtholzplatte 20 mm mit Anti-Ölimprägnierung, mit Seitenrändern und einem hinterem Rand H 40 mm.

MORSE E PORTAMORSE

I portamorse sono disponibili in due modelli, portamorsa a sfilare e portamorsa basculante.  
Le morse sono disponibili in quattro modelli e due versioni in base alle proprie esigenze lavorative, si possono avere con o senza base girevole.

VICE AND VICE HOLDER

Vice holders are available in two models, extractable vice holder and tilting vice holder.  
Four models are available and two types, according to work's need, they can be with or without revolving base.

SCHRAUBSTÖCKE UND SCHRAUBSTOCKHALTERUNG

2 Typen von Schraubstockhalterungen stehen zur Verfügung, ein ausziehbares Modell und ein ausklappbares.  
Schraubstöcke gibt es in 4 verschiedenen Modellen und 2 Ausführungen, passend zu den eigenen Arbeitsbedürfnissen.  
Schraubstöcke stehen mit oder ohne Drehteller zur Verfügung.

PORTAMORSA A SFILARE

Il portamorsa a sfilare è un pratico sistema che occupa poco spazio. Viene installato nella struttura dell'arredamento facendone un corpo unico, garantendo così robustezza, praticità e utilità. E' realizzato in acciaio verniciato a polveri.

EXTRACTABLE VICE HOLDER

The extractable vice holder is a handy system that takes little space. It is installed in the structure of the equipment, creating in that way a unique body with it and guaranteeing strength, convenience and utility. It's all made of powder-coated steel.

AUSZIEHBARE SCHRAUBENSTOCKHALTERUNG

Die ausziehbare Schraubstockhalterung ist ein praktisches System, das wenig Platz benötigt. Sie wird in die Struktur der Fahrzeugeinrichtung montiert und erscheint so als Gesamtkorpus. Sie ist aus pulverbeschichtetem Aluminium hergestellt.

#### SUPPORTO MORSA ESTENSIBILE

Pratico supporto regolabile in altezza che viene posto nei portamorsa a sfilare per offrire una migliore robustezza durante l'utilizzo della morsa.

#### EXTENSIBLE VICE HOLDER

Handy support adjustable in height to use together with extensible vice holder, offering in that way more strength while working with the vice.

#### AUSZIEHBARE SCHRAUBENSTOCKHALTERUNG

Der Stützfuß für die ausziehbaren Schraubstockhalter ist ein praktisches Höhenverstellbares Stützelement. Er stabilisiert den Schraubstockhalter bei schweren Arbeiten mit dem Schraubstock.

#### CASSETTIERE SOTTOPIANALE

Le cassette sottopianale offrono la possibilità di trasportare tutto il materiale che vi occorre duplicando lo spazio di carico del vostro furgone, in quanto vanno poste al di sotto dell'apposito pianale. La portata massima del pianale è di 900 Kg., con peso distribuito uniformemente, e l'altezza rimanente del piano di carico è di circa un metro. I Kit Cassettiere sottopianale sono disponibili per i seguenti modelli: Fiat Doblò, Ford Connect passo corto, Renault Kangoo - Nissan Kubistar, Citroen Berlingo - Peugeot Ranch, Volkswagen Caddy e Opel Combo, solo per le versioni a 3 porte. La cassetta sottopianale illustrata in figura è composta da un telaio, 2 cassetti da 410x80x900 con o senza tappetini divisorii e da due coppie di guide a sfera da 800mm ad estrazione totale, con una portata massima di 120 Kg. La cassetta sottopianale illustrata in figura è composta da un telaio, un cassetto da 410x160x900 con o senza tappetini divisorii e da una coppia di guide a sfera da 800mm ad estrazione totale, con una portata massima di 120 Kg.

#### UNDERFLOOR CHEST OF DRAWERS

An under floor chest of drawers offers the possibility to transport all you need making the loading space of your vehicle double, as it goes under an appropriate floor. The floor's maximum capacity is about 900 Kg., with the weight equally distributed, and the remaining height of the loading area is about one meter. The under floor chest of drawers is available for following models: Fiat Doblò, Ford Connect short pitch, Renault Kangoo - Nissan Kubistar, Citroen Berlingo - Peugeot Ranch, Volkswagen Caddy e Opel Combo, only for the three doors version. The under floor chest of drawers shown in the picture is composed of a frame, 2 drawers of dimension 410x80x900 with or without mats and dividers and two couples of 800mm ball-bearing guides for total extraction, with a maximum capacity of 120 Kg. The under floor chest of drawers shown in the picture is composed of a frame, one drawer of dimension 410x160x900 with or without mats and dividers and two couples of 800mm ball-bearing guides for total extraction, with a maximum capacity of 120 Kg.

#### UNTERBODENSCHUBKÄSTEN

Gib Dieben keine Chance! Mit dem Doppelten Boden von Order System kann man Werkzeuge und andere wertvolle Gegenstände sicher verbergen. Ideal für kleinere Fahrzeuge. Die maximale Traglast des Unterbodens beträgt 900 kg, bei gleichmäßig verteiltem Gewicht. Die noch vorhandene Höhe der Ladefläche beträgt ca. 1 Meter. Unterbodenschubkasten-Kits sind für folgende Modelle verfügbar: Fiat Doblò, Ford Connect Radstand kurz, Renault Kangoo, Nissan Kubistar, Citroen Berlingo - Peugeot Ranch, Volkswagen Caddy und Opel Combo, nur 3-Türige Version. Die Unterbodenschubkästen gibt es in zwei Ausführungen. Die erste besteht aus einem Rahmen, aus 2 410x80x900 mm Schubladen mit oder ohne Antirutschmatte und Trennwänden und aus zwei Paar 800 mm kugellagerten Führungsschienen mit Vollauszug. Die maximale Traglast beträgt 120 kg. Die zweite Ausführung besteht aus einem Rahmen, aus einer 410x160x900 mm Schublade mit oder ohne Matte und Trennwänden und aus zwei Paar 800 mm kugellagerten Führungsschienen mit Vollauszug. Die maximale Traglast beträgt auch 120 Kg.

ACCESSORI PER BLOCCAGGIO MATERIALE

ORDER System in questa categoria ha studiato i migliori sistemi per bloccare il materiale all'interno del vostro furgone.

BLOCKING ACCESSORIES

In this category ORDER System has planned the best blocking system for material carried inside your vehicle.

ZUBEHÖR ZUR LADUNGSSICHERUNG

In dieser Kategorie finden Sie alles was sie zum Sichern von Waren und Materialien in Ihrem Fahrzeug benötigen.

BARRA FERMACARICHI IN ACCIAIO CON CINGHIA

Pratico sistema che permette di tenere ancorato al furgone ogni tipo di carico. La struttura in acciaio zincato disponibile in verghe da 3 metri e può anche essere tagliata a misura secondo le esigenze del cliente. Le cinghie in nylon con tirante a cricchetto hanno una portata di 4.000 Kg e sono disponibile in varie lunghezze.

STEEL CARGOWEIGHT BAR WITH STRAP

Practical system through which it is possible to keep every kind of load anchored to the van. The structure is in galvanized steel available in 3m long bars that can also be cut following the customer's needs. Straps are in nylon with ratchet, they can support up to 4000 Kg and are available in various lengths.

LAST-AUFHALTESCHIENE AUS STAHL MIT GURT

Praktisches System, das die Sicherung von fast jeder Ladungsart am Fahrzeug ermöglicht. Schienen aus verzinktem Stahl, werden je nach Bedarf auf Maß geschnitten. Gurt aus Nylon mit Spannschloss, mit einer Belastbarkeit von 4000 kg, in verschiedenen Längen verfügbar.

#### ASTA FERMACARICHI REGOLABILE

Le aste fermacarichi permettono di bloccare facilmente il materiale all'interno del vano di carico del furgone, e grazie al loro rivestimento in gomma non rovinano il materiale e garantiscono un buon grip durante il trasporto. Sull'estremità sono dotate di sistema a molla che le permette di fissare e sganciare in tutta facilità lungo le apposite rotaie poste nella parte superiore e inferiore del furgone.

#### ADJUSTABLE BLOCK BAR

Block bars allow to secure the material inside the vehicle in an easy way and, thanks to their rubber cover, the material is not damaged and a good grip is guaranteed during the transport. At both ends the bars are provided with a spring-system that permits to hook and unhook them easily all along the foreseen rails placed in the upper and lower part of the vehicle.

#### HÖHENVERSTELLBARE SPANNSTANGE

Die Spannstangen ermöglichen einfaches Sichern des Materials im Inneren des Fahrzeuges. Dank Ihrer Gummiverkleidung beschädigen sie nicht das Material und garantieren einen guten Halt während des Transportes. An den Enden sind sie mit einem Federsystem versehen, das ein sehr einfaches Befestigen und Abmontieren in den vorgesehenen Schienen ermöglicht.

#### PIASTRINE DI ANCORAGGIO

Le piastrine di ancoraggio alla carrozzeria permettono di tenere ancorato qualsiasi carico al pianale del furgone.

#### LOCK PLATE

Lock plates fixed to the body of the van permit to keep any load anchored to the van's floor.

#### VERANKERUNGSPLETTEN

Die Verankerungsplatten an der Fahrzeugkarosserie ermöglichen die Verankerung jeder Last am Fahrzeugboden.

#### GANCI FLESSIBILI

I nuovi attacchi flessibili Order System, permettono di sostenere elementi verticali pesanti con sezione tubolare nelle pareti del vostro furgone. Essi possono essere inseriti in serie su una guida di alluminio per essere montati più facilmente, ma sono anche predisposti per essere montati direttamente e singolarmente su una superficie.

#### FLEXIBLE HOLDERS

The new Order System shelving for cylinders is suitable for everyone who needs to carry cylinders on their vehicle. Thanks to the special strengthened shelf it's possible to install and fix several cylinders in a safe way. Even in case of an abrupt bracking anything moves and damages people or things inside the vehicle.

#### MEHRZWECK-HALTERUNGEN

Die neuen Mehrzweck-Halterungen von Order System werden an der Fahrzeugkarosserie oder der Fahrzeugeinrichtung befestigt und ermöglichen das Halten und den Transport von verschiedenen Gegenständen wie Besen oder Schaufeln. Die Halterungen werden an einer Aluminiumschiene befestigt in der sie flexibel bewegt werden können. Die Befestigung einzelner Halterungen ohne Schiene ist auch möglich.

#### SLITTA PORTAGENERATORE

Slitta estraibile per carichi pesanti, utilizzabile per generatori, materiale Order e per qualsiasi altro carico che si vuol estrarre dal furgone. Dimensioni 360x90x1014 con estrazione da 900mm e portata di 230 Kg.

#### SLIDE FOR ELECTRIC GENERATOR

Extractable slide for heavy cargos, it can be used also for electric generators, Order materials and for any other heavy cargo that you want to carry out from the van. Dimensions 360x90x1014 with a 900mm extraction and 230 Kg of capacity.

#### GENERATORSCHLITTEN

Ausziehbarer Schlitten für Schwergut wie Generatoren, Order Regale oder jedes andere Gut, das man vom Fahrzeug ausladen möchte. 900mm Auszug, Traglast 230 kg.

#### SISTEMA ESTRAIBILE

Il nuovo sistema estraibile Order System® permette la movimentazione di materiali e attrezzature pesanti e ingombranti in tutta facilità, salvaguardando la salute degli operatori, il mezzo e il materiale trasportato. Infatti estraendo la slitta order system® è possibile caricare/scaricare il materiale in tutta sicurezza e ancorarlo alla stessa con estrema comodità. Il sistema è dotato di guide in alluminio ad alta portata e può essere estratto fino al 60% della sua lunghezza; il piano aperto può essere bloccato in qualsiasi posizione secondo la necessità dell'operatore. La portata massima è di 300 kg uniformemente distribuiti su tutto il piano.

#### SLIDE OUT-SYSTEM

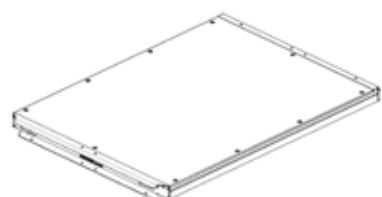

Our extractable fastening system allow to easily handle heavy and bulky material and equipment with the aim of safeguarding workers health, ensuring protection to the vehicle and the loaded material. In fact with the slide-out solution proposed by Order System® is possible to load and unload the material safely and comfortably fastening the goods. The system is equipped with high-capacity aluminum slides and can be extracted up to 60% of its length; the open floor of the slide system can be stopped and blocked in every positions. The maximum capacity is 300 kg spread on all the surface.

#### HERAUSNEHBARES SYSTEM

Das neue herausnehmbare System gibt die Möglichkeit, schweres und platzinnehmendes Material und Ausstattungen einfach herauszunehmen, wobei darauf geachtet wird, dass weder Arbeiter, Material noch Fahrzeuge zu Schaden kommen. Wenn die herausziehbare Schiene benutzt wird, kann man die Fahrzeuge leicht und sicher be- und entladen. Das System ist mit Aluminiumführern von höchster Leistungsfähigkeit ausgestattet und man kann sie bis zu 60% ihrer Länge herausziehen. Die obere Schiene kann man in jeder Position je nach Bedarf blockieren. Das zugelassene Höchstgewicht ist 300kg, gleichmäßig verteilt.

#### LAVORATE IN SICUREZZA CON IL SISTEMA D'AREAZIONE ORDER SYSTEM

Attenzione: secondo le norme sul trasporto su strada (GGVS) e le istruzioni DSV 0211 in caso di trasporto di bombole di gas è necessario un sistema di aerazione del veicolo con aperture libere di almeno 2 volte 100cm<sup>2</sup>. La norma richiede di applicare un'apertura d'aerazione anteriormente sul tetto del veicolo ed un'altra apertura posteriormente in basso in modo da creare una depressione che spinge fuori i gas. Grazie ai nostri sistemi di aerazione Order System il volume di gas nel vostro furgone viene continuamente cambiato.

#### WORK IN SAFETY WITH ORDER SYSTEM VENTILATION GRILLS

Pay attention: according to the law for transport on the road (GGVS) and to the instructions DSV 0211 in case of cylinders' transport a ventilation system in the vehicle is necessary with free opening of at least 2 times 100cm<sup>2</sup>. Following the rule a ventilation opening is necessary in the front of the roof and an other one in the back lower part of the vehicle in order to create a depression that push all the gas outside. Thanks to our ORDER System ventilation grills the gas volume inside your vehicle will constantly change.

#### SICHER ARBEITEN MIT DEM ORDER SYSTEM BELÜFTUNGSSYSTEM

Achtung: laut Strassentransport Normen (GGVS) und DSV 0211 Bestimmungen beim Transport von Gasflaschen benötigt man im Fahrzeug 2 Öffnungen die jeweils mindestens 100cm<sup>2</sup> groß sind. Die Norm verlangt zwei Belüftungs- Öffnungen, eine Öffnung im Dach des Fahrzeuges und eine am Boden, um einen Unterdruck herzustellen, der die Gase aus dem Fahrzeug fliesen lässt. Dank unserem Order System Belüftungssystem wird das "Gas-Problem" in Ihrem Fahrzeug gelöst!

#### SERRATURA DI SICUREZZA

La serratura di sicurezza rappresenta una delle chiusure più sicure e resistenti allo scasso, in quanto il cilindro è antitrapano e antipicking. Protegge con sicurezza dalle intrusioni il vano di carico dei mezzi per il piccolo trasporto.

#### SECURITY LOCK

Our security locks are one of the safest and resistant to break-in locking systems thanks to its anti-drilling and anti-picking cylinder. It safely protects the loading area of a vehicle from any intrusion.

#### SICHERHEITSSCHLOSS

Das sicherheitsschloss ist eines der sichersten und widerstandsfähigsten Schlösser, da der Zylinder bohrfest ist. Voller Schutz der Lagerflächen von kleinen Nutzfahrzeugen.

#### TASCHE IN ALLUMINIO

Realizzate interamente in alluminio possono essere fissate sia lungo i fianchi dei prodotti Order o sulle pareti del furgone. Esse sono state realizzate per contenere materiale cartaceo come ad esempio depliant dimostrativi o cataloghi.

#### ALUMINIUM POCKETS

Entirely made of aluminium they can be fixed whether all long the sides of Order products or on the walls of the van. They have been studied for keeping papers and documents, such as leaflets or catalogues.

#### ALUMINIUMTASCHEN

Komplett aus Aluminium. Zum Verstauen von Papiermaterial wie Prospekte oder Kataloge. Zur Montage an der Fahrzeugeinrichtung sowie an der Fahrzeugkarosserie geeignet.

#### RAMPA TELESCOPICA IN ALLUMINIO

Rampa in alluminio anodizzato con sistema di installazione rapido, adatto a qualsiasi tipo di veicolo commerciale. Una volta installata la piastra al pavimento la rampa si aggancia e si sgancia facilmente. La rampa si allunga fino a 175 cm tramite scorrimento telescopico. Larghezza interna di 15 cm, portata max. 130 kg.

#### ALUMINIUM RAMP

Anodized aluminum ramp installation system suitable for side and rear doors of every commercial vehicles. Once installed the plate to the floor the ramp engages and disengages easily. The ramp extends up to 175 cm through an telescopic slide. Internal width of 15 cm, max capacity 130 kg.

#### ALUMINIUM LADERAMPE

Eloxierte Aluminium Rampe mit Installationssystem geeignet für seitliche und hintere Türen von allen Nutzfahrzeugen. Nach dem Anlegen der Rampen am Fahrzeugboden einfach die Arretierung an den Rampen lösen um Sie auf die gewünschte Länge auszuziehen. Die Rampen lassen sich auf bis zu 175 cm ausziehen. Innenbreite 15 cm, max. Belastung 130 kg.

#### FAST BLOCK

Pratico sistema che permette di bloccare e sbloccare facilmente con un semplice klik parte dell'allestimento o un carrello alla scocca del vostro furgone, impedendone così ogni tipo di movimento e viaggiando in totale sicurezza. Questo sistema vi permetterà di muovere all'occorrenza parte dell'allestimento o, nel caso di un carrello, di trasportare senza fatica tutti i vostri attrezzi e il materiale necessario sul posto di lavoro.

#### FAST BLOCK

Practical system that allows you to easily lock and unlock with a simple click part of the equipment, or a cart, to the body of your Vehicle, preventing in that way your material from moving and letting you drive in all safe. Thanks to this system you could move part of your equipment when needed, or in the case of a trolley, you could bring all your tools just in the workplace.

#### FAST BLOCK

Praktisches System, dass eine einfache Sperrung oder Entsperrung der Ausstattung oder Werkzeugwagen vom Nutzwagen durch ein simplen Klick erlaubt, verhindert somit jede Art von Bewegung und die sicherheit bei der Fahrt. Dieses System ermöglicht Ihnen die einfache Handhabung all Ihre Arbeitswerkzeuge.

LAMPEGGIANTE

Lampeggiante rotante di colore arancione, dotato di base magnetica che ne facilita notevolmente il montaggio e il posizionamento in qualsiasi angolo del furgone, sia all'esterno che all'interno. Il collegamento avviene tramite la presa maschio da porre nell'accendisigari. Il cavo è ad spirale in modo da ridurre l'ingombro.

ROTATING LIGHT

Orange rotating light, provided with a magnetic base through which it can be easily assembled and can be put in any corner of the vehicle, both inside and outside. In order to let it work the male plug has to be connected to the cigarette lighter plug. It's provided with a spiral cable for reducing the volume.

RUNDUM-LEUCHTE

Die Orange Rundum-Leuchte ist mit einer Magnetbasis versehen, dadurch ist die Platzierung an jeder Stelle des Fahrzeuges, innen sowie außen möglich. Die Stromzufuhr erfolgt durch einen 12V Anschluss über den Zigarettenanzünder. Um den Platzbedarf zu reduzieren ist das Kabel spiralförmig.

FARETTO ORIENTABILE MAGNETICO

Il faretto da 12v va collegato mediante l'impianto elettrico alla batteria. È dotato di base magnetica che ne facilita notevolmente il montaggio e il posizionamento in qualsiasi angolo del furgone, sia all'esterno che all'interno. Il collegamento avviene tramite la presa maschio da porre nell'accendisigari. Il cavo è ad spirale in modo da ridurre l'ingombro.

MAGNETIC ADJUSTABLE LIGHT

The 12v light has to be connected to the battery through a wiring. It's provided with a magnetic base through which its assembly becomes very easy and it can be put in any corner of the vehicle, both inside and outside. In order to have light the male plug has to be connected to the cigarette lighter plug. It's provided with a spiral cable for reducing the volume.

SCHWENKBARE BELEUCHTUNG MIT MAGNETFUSS

Die Beleuchtung ist mit einer Magnetbasis versehen, die die Platzierung an jeder Stelle des Fahrzeuges, innen wie außen, ermöglicht. Die Stromzufuhr erfolgt direkt durch die Fahrzeugbatterie oder durch einen 12V Anschluss über den Zigarettenanzünder.

## PORTASCALE E PORTATUTTO

Caricare e scaricare le scale dal tetto del vostro furgone ora non è più un problema. Il portascala ORDER System permette di scaricare velocemente e senza sforzo le scale dal vostro furgone nella massima sicurezza e in qualsiasi posizione di parcheggio. Il portascala a discesa laterale è l'unico che permette di caricare e scaricare qualsiasi scala in pochissimo spazio, inoltre è l'unico con il dispositivo di fissaggio a morsa con molla automatica che garantisce la posizione solida e sicura della scala una volta chiusa e pronta per il trasporto.

## LADDER RACKS AND ROOF RACKS

Loading and unloading ladders on/from the roof of your vehicle is no more a problem. ORDER System Ladder Rack allows you to unload the ladders from your vehicle in a quickly and easily way, in greatest safety and wherever your vehicle is parked. The Rotation Ladder Rack is the only one that let you load or unload any ladder in small areas and in a very short time, furthermore it's the unique provided with the Quick Clamp System, an automatic blocking spring guaranteeing that ladders stay firmly and safely in place once closed, secured into the stowed position and ready to be carried away.

## LEITERHALTERUNG UND ALLESTRÄGER

Auf- und Abladen der Leiter vom Dach Ihres Fahrzeuges ist kein Problem mehr! Mit dem ORDER System Dachträger kann man schnell, mühelos, sicher und in jeder Parkposition die Leiter vom Dach Ihres Fahrzeuges auf- und abladen. Der Leiterträger mit seitlich schwenkbarer Halterung ist der einzige, mit dem man jede Leiter in beschränktem Raum auf- und abladen kann. Außerdem ist es das einzige System mit Spannhelme und automatischer Feder, das eine feste und sichere Platzierung der Leiter garantiert, die nach dem aufladen sofort transportbereit ist.

## KIT PER APPESO

Pratico sistema che permette di trasportare capi d'abbigliamento sul vostro furgone in tutta comodità e praticità disponibile in diversi kit in base alle proprie esigenze lavorative.

## HANGING UP KIT

Handy system that allows the transport of items of clothing on your vehicle with greatest comfort and convenience, available in different kits in accordance with each working need.

## KLEIDERSTANGENSYSTEM

Praktisches System, das den bequemen Transport von Kleidungsstücken in Ihrem Fahrzeug ermöglicht. In verschiedenen Kits, passend für Ihre Arbeitsbedürfnisse, verfügbar.

#### CASSONI CON PORTA SUPERIORE

I cassoni con porta superiore sono adatti per il trasporto delle attrezzature su furgoni cassonati aperti. Sono realizzati in acciaio zincato, o zincato verniciato. Il profilo e la struttura conformati in modo da impedire l'infiltrazione di acqua all'interno. Sono provvisti di chiusure in acciaio lucchettabili. Disponibili in due misure, 1000x600x600 mm e 1800x600x600 mm completamente smontabili in modo da ridurre l'ingombro e eventuali spese di spedizione.

#### TOOLBOXES WITH UPPER DOOR

Toolboxes with upper door are useful for transport of working equipments on open vans. They are made of galvanized steel or painted galvanized steel. Their profile and structure are built in such a way that internal seepage is avoided. They are provided with steel closing to which also a padlock can be applied. Available in two dimensions, 1000x600x600 mm and 1800x600x600 mm they can be completely knocked down in order to reduce volume and shipment expenses.

#### KISTEN FÜR PRITSCHENWAGEN

Kisten mit oberer Tür eignen sich für den Transport von Material auf offenen Nutzfahrzeugen. Sie sind aus verzinktem und lackiertem Stahl hergestellt. Das Profil und die Struktur der Kisten ist so gebaut, dass kein Wasser eindringen kann.

#### RAMPE DI CARICO

Grazie all'innovativo sistema delle rampe di carico è possibile caricare e scaricare macchinari, carrelli, e ogni altro tipo di carico in tutta facilità e senza fatica. Le dimensioni delle rampe di carico variano in base al veicolo e in base alle diverse esigenze di carico.

#### LOADING RAMPS

Thanks to the innovative ramps' system it's possible to load and unload machineries, trolleys, and any other kind of cargo with great ease and without effort. Ramps' dimensions change in accordance to the vehicle's model and following different loading needs.

#### LADERAMPEN

Aufgrund des innovativen Systems der Laderampen ist es möglich Maschinen, Fahrgestelle und jede andere Art von Last, leicht und ohne Aufwand auf- und auszuladen. Die Maße der Laderampen ändern sich in Bezug auf das Fahrzeug und die verschiedenen Ladebedürfnisse.

#### COVER

Rivestimento interno che rende il vano di carico del furgone perfettamente:

LAVABILE - IMPERMEABILE - NON DEPERIBILE A DISINFEZIONE

E' un kit componibile da pareti preformate sulle fiancate del veicolo che nulla toglie al volume di carico e soprattutto alla portata del veicolo.

#### COVER

Internal cover that makes the loading area of a van perfectly

WASHABLE - WATERPROOF - RESISTANT TO DISINFECTIONS

The kit is composed by pre-shaped covers on the walls of the vehicle that doesn't reduce the loading volume and, above all, its maximum capacity.

#### COVER

Innenverkleidung, die den Laderaum vollkommen abdichtet.

ABWASCHBAR - UNDURCHLÄSSIG

Es handelt sich um einen Einbau-Kit aus vorgeformten Wänden, die auf den Seitenwänden des Fahrzeuges weder Volumen noch Traglast vermindern.
